SUMMARY

Cloud Data Engineer with nearly 4 years of experience architecting production-grade ETL/ELT pipelines, data lake solutions, and cloud migration projects on AWS. Delivered **GBP 487K in annual client infrastructure savings** across UK/US client engagements. Shipped **150+ pipelines** in medallion architecture processing hundreds of GBs daily. Works across distributed, multi-location teams spanning UK and US time zones – with a strong async communication and independent delivery track record. Comfortable owning end-to-end delivery with minimal supervision.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner**

July 2025 – July 2028

Credly: Badge | Validation: a6447414ae25419cba12941481cd10a2

- **AWS Certified Data Engineer – Associate (DEA-C01)**

In Progress

SKILLS

- **Core AWS:** Glue (PySpark), EMR, S3, Redshift, Athena, Lambda, Step Functions, DMS, RDS, EventBridge, DynamoDB
- **Languages:** Python (OOP), Pandas, NumPy, PySpark, SQL, Shell Scripting
- **Orchestration & CI/CD:** AWS Step Functions (production), Apache Airflow (familiar), Jenkins, Git
- **Data & Storage:** Parquet, Delta Lake (production), Apache Iceberg (familiar), Snowflake, Redshift, Athena, PostgreSQL, MySQL, MongoDB, DynamoDB, Oracle
- **Patterns:** Medallion architecture, CDC/SCD, TB-scale full reloads, event-driven ingestion, cloud migration, DataOps, data observability, serverless compute, Agile/Scrum
- **Remote & Collaboration:** Jira, Slack, Confluence, Zoom, Microsoft Teams, Notion, async documentation

EXPERIENCE

Tata Consultancy Services

Kolkata, India

Data Engineer

July 2022 – Present

- **Infrastructure cost savings:** Delivered **GBP 487K in annual client infrastructure savings** by migrating on-prem MongoDB to AWS (S3, Glue, Lambda, DynamoDB, Athena) via DMS – decommissioning on-prem servers, vendor contracts, and licensing across UK/US client environments.
- **Distributed delivery:** Took end-to-end ownership of 150+ production ETL/ELT pipelines across a multi-location team spanning UK and US time zones – processing hundreds of GBs daily with ad-hoc TB-scale full refreshes, zero missed production SLAs.
- **Async collaboration:** Maintained seamless cross-timezone communication with UK and US stakeholders via Jira, Slack, and Confluence – documenting decisions, flagging blockers proactively, reducing unnecessary sync meetings across distributed teams.
- **Self-service enablement:** Extended Jenkins CI/CD access to distributed QA teams with scoped permissions – cut **50+ daily engineering interruptions** to near-zero, giving remote teams autonomy without back-and-forth dependency on engineering.
- **Query optimisation:** Improved Athena and Redshift query performance by **25%** via partition pruning and predicate pushdown, cutting reporting latency for distributed end-user dashboards.
- **Schema automation:** Built automated schema discovery for Parquet and JSON, reducing downstream data latency by **30%** and removing manual schema maintenance for 3+ geographically distributed teams.

PROJECTS

- **Near-Real-Time Event-Driven ELT System** (Python, Lambda, DynamoDB, Snowflake)
 - Built event-driven ingestion via Lambda, landing semi-structured JSON into S3 and loading to Snowflake via Snowpipe with sub-minute latency – replacing a 4-hour batch process.
 - Downstream teams got same-day data without waiting for a scheduled run or raising an engineering request.
- **Serverless Batch Analytics Pipeline** (AWS Glue, S3, Athena, PySpark, Step Functions)
 - Designed a medallion data lake on S3 with PySpark transformations in Glue, orchestrated by Step Functions, queryable via Athena with no standing cluster.
 - Delivered a self-serve SQL layer – analysts run ad-hoc queries without opening an engineering ticket.

EDUCATION

Maulana Abul Kalam Azad University of Technology (MAKAUT)

2018 – 2022

Bachelor of Technology (B.Tech) – Computer Science and Engineering

DGPA: 8.90
